

Lean / TPS Starter Guide

TrueLean Solutions | Clarity. Simplicity. Results.

Five questions to begin seeing your operation differently

- Where does customer value actually get created?
- What work is waiting, moving, being reworked, or performed more than once?
- Where is flow interrupted by constraints, shortages, changeovers, approvals, or unstable equipment?
- What problems are visible every day but are not being solved at the source?
- What operating routine would help leaders and teams see performance and respond faster?
- Use this guide as a conversation starter - not as a substitute for observing the work.
